Forecast for Tuesday 10 Jan 2023

Weather: Cloudy but dry to start, before rain, with snow above 600m, pushes up from the southwest through the first half of the morning. Turning to rain at all levels during the afternoon, rain will be heavy and persistent until around mid-afternoon, then becoming lighter and patchier into the evening. A mix of clear spells and scattered rain or sleet showers thereafter.

Chance of cloud-free hill tops above 800m: 30% chance before the rain arrives then very low through much of the day. 40% chance into the evening.

Low Cloud and visibility: Cloud and fog above around 400m for majority of the day with poor visibility. Blizzards and whiteout conditions above 800m for several hours. Cloud breaking up into the evening with visibility improving.

Met Office Aberdeen Meteorologist's View
Very strong winds, particularly in association with the heavy rain/snow, will lead to difficult conditions and feeling very cold.

Forecast for Wednesday 11 Jan 2023
Weather: Frequent blustery showers throughout the day, falling as a mix of rain, sleet and snow. The showers falling as snow above 600m. Best of the drier weather in the northeast.

Maximum wind: Southwesterly 20-25 mph gusting 45 mph at first, easing to 15 gusting 30 mph through the morning and reducing into the evening.

Chance of cloud-free hill tops above 800m: 20% in any breaks between showers, but 60% in northeast.

Low Cloud and visibility: Good visibility at times but generally poor in showers with occasional low cloud down to 300-400m.

Temperature: **Glens:** Plus 2 Celsius rising to plus 5 Celsius.
At 800m: Minus 2 Celsius rising to 0 Celsius.
Freezing level: 600m rising to 800m
